SALMET - LAYING NEST

High nest entrance creates shadows inside the nest which reduces displaced eggs

Liftable floor assures best egg quality since it closes the nest at night

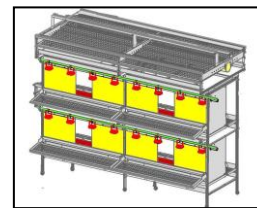

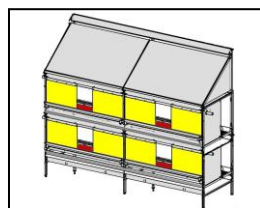

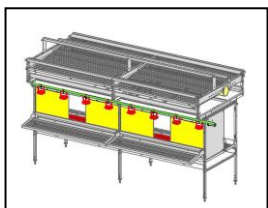

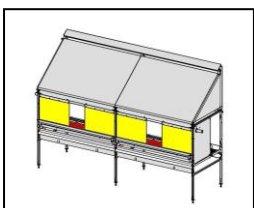

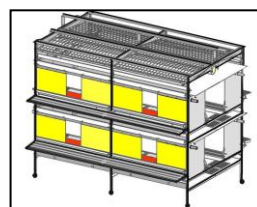

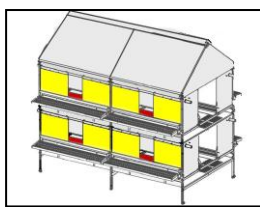

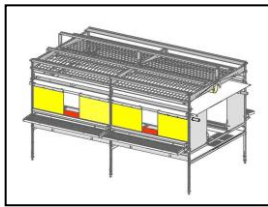

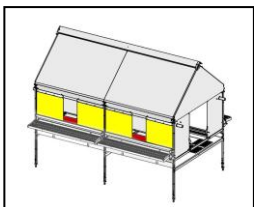

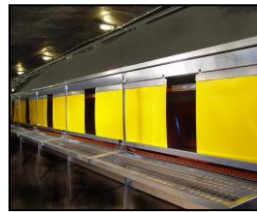

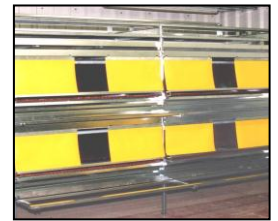

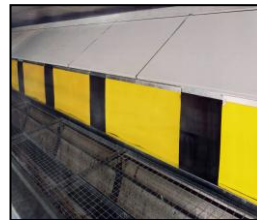

Simple management; easy to reach and to control. Liftable floor automatically ejects dead birds

Movable approach ramp in front of nest entrance in conjunction with the nest floor is optional

Fast cleaning of the nest metal structure
Removable floor, backwalls, nest curtain and roof top for max. hygiene

1250 mm wide single and double nest; 450 mm deep available

Additional usable area through roof slat possible

Technical details are subject to change 2014
